# Installing the Caster Plugin (Windows)

1. On the computer system running Plex Media Server (PMS), right-click on its tray icon, and select *Open Plug-ins Folder*:

2. Copy the entire *Caster.bundle* folder, to PMS's plug-in folder:

3. After a bit, the plug-in should show up in the PMS's Media Manager (right-click the PMS tray icon, and select *Media Manager...*; if you already have it open, refresh the browser). If it doesn't appear after a few minutes, restart PMS (right-click the PMS tray icon, select *Exit* then, re-launch the PMS application).
